

**Product Name :**  
SCR Based D C Supply Panel Manufacturer

**Product Code :**  
EEC0002

**Description :**

SCR Based D C Supply Panel Manufacturer

**Technical Specification :**

Equipped with highly advanced technology, we manufacture SCR Based D C Supply panels using superior quality raw materials. These DC supply panels are in 3 phases completely controlled with the S.C.R based bridge convertor. We offer these DC suppliers in various sizes, panels and capacities as per the requirements of clients. These are p[raised for its durable quality, unique features like safety in terms from any of

---

electrical faults and short-circuits.

## Fault Diagnosis And Safety Features

- Over load trip.
- Single phase/under voltage trip
- Immediate over current trip
- Voltage fold back for current limit
- Regulation is better than  $\pm 1\%$ .
- Regulator card used to monitor voltages and wave forms in various test points.
- Power card and regulator card consist of perfect control system
- Regulator card isolated from main power
- Easy changeability for the supply of voltage
- Panels with voltage meter and current meter in front
- For the easy searching of faults the enunciator is in front door with DC voltage settings
- Resistance of burden available on D.C supply as S.C.R voltage devices
- Output voltage varies from 0 to 230V
- C. Voltage build up has a smooth start features.
- Rating available: 200Amp/100Amp/60Amp/30Amp
