

Product Name :
 Slab Trolley with Rails

Product Code :
 Slab Trolley0001

Description :

Slab Trolley with Rails

Technical Specification :

Slab trolley also is known as Tilting bucket or rail trolley is used to carry concrete Slab. It is also used during the excavation of slab to carry the material. They are commonly used in chemical plants, material handling plants, batching plants, pharmaceutical plants, and cement plants. Manufactured using high- quality raw material and components, these trolleys can swivel 360 degrees around its axis and can easily tilt 90- degree angle.

Slab Trolley is considered one of the versatile construction equipment at the construction site. With its ability to transit ready mix concrete from on to another location. It functions in the horizontal direction. It also helps in making over building work that takes place in the single plane. The trolley can hold up to 0.3 cubic meters of ready mix concrete.

Often found at the high level of building constructions like multiplex, multi-storied buildings, big commercial complexes and similar projects which include difficult task. The Slab Trolley along with Tower Hoist makes it easy, reliable and fast to transit the process.

For easy installation, swivels in 360 around its axis and can be tilted at 90

Make with 40 mm dia pipe with left and right bends.

Heavy duty wheels with ball bearings
