

Product Name :
Thyristor Time Delay Relay

Product Code :
EEB0007

Description :

Thyristor Time Delay Relay

Technical Specification :

Thyristor Time Delay Relay

Power Electronic Training Board has been designed specifically to study the operation of SCR and TRIAC triggered by electronic time delay circuit. This facilitates to perform the experiment to students

both the modes of operation-delayed turn on and auto turn off to control any type of load i.e. A.C. or D.C. Practical experience on this board carries great educative value for Science and Engineering Students.

Object:

- Study of delayed Turn-ON of D.C. load
- Study of auto Turn-OFF of D.C. load
- Study of delayed Turn-ON of TRIAC as line switch
- Study of auto Turn-OFF of TRIAC as line switch

Features:

The board consists of the following built in parts:

- 12V D.C. at 2 Amp, Power Supply internally connected
- UJT 2N 2646 used as timer
- Potentiometer for ramp control to adjust time delay
- Set of 3 Capacitors for time delay control
- Two SCRs connected in parallel coupled mode
- Commutation capacitor.
- Push button switch for starting
- TRIAC for A.C. line switch
- Lamp holder with 15 watt 230V lamp for A.C. load
- Adequate no. of other Electronic Components
- The unit is operative on 230V $\pm 10\%$ at 50Hz A.C. Mains
- Adequate no. of patch cords stackable 4 mm spring loaded plug length $\frac{1}{2}$ metre
- Good Quality, reliable terminal/sockets are provided at appropriate places on panel for

connections/observation of waveforms

- Strongly supported by detailed Operating Instructions, giving details of Object, Theory, Design procedures, Report Suggestions and Book References.
- Weight : 3 Kg. (Approx.)
- Dimension : W 340 x H 110 x D 210
- Other Apparatus Required
- Digital Stop Clock
