

Product Name :
Training Set for Isuzu Diesel Engine

Product Code :
CIVIL-ATE-09-0002

Description :

Training Set for Isuzu Diesel Engine

Technical Specification :

Introduction to the Training Set for Isuzu Diesel Engine

The training set uses a rotor pump diesel engine assembly with complete accessories. It can be used to complete various training processes for engine loads. It is suitable for practical training of car engine structure and maintenance in medium and senior vocational schools and car training institutions. It also satisfies the requirements of teaching and training projects on the electronic controlled engine structure, working principle, fault diagnosis, fault setting and exclusion assessment.

Basic Configuration of the Training Set for Isuzu Diesel Engine

Diesel engine assembly

Engine circuit plug

Combination instrument

Training panel

Diagnostic block

Tank assembly

Up and down pipe

Kettle

Cooling fan assembly and bracket

Fuel pressure gauge

Vacuum gauge

Battery

Starter

Generator

Startup switch

Fuel pump assembly

Fuel filter

Air filter

Diesel glow plugs

Intake and exhaust manifolds

Oil tank

Movable bench and mobile casters

General power switch

Relay and fuse box

Instruction manual

User training guide

Features of the Training Set for Isuzu Diesel Engine

1. Demonstrate the engine work, run smoothly, accurate reflection of the electrically controlled diesel engine structure and working principle
2. Demonstrate engine oil pressure, oil pressure and normal operating pressure
3. Can simulate actual working conditions to set multiple faults
4. Rotation position of training sets is done equipped with safety shields to keep students and teachers safe.
5. Training sets are equipped with an extinguisher and short circuit self-protection device
6. With locking casters for mobile devices, it is easy to move for teaching

Training Content

1. Diesel engine structure and composition training
2. Engine component installation position training
3. Engine fuel pressure, oil pressure training
4. Engine troubleshooting and confirm training
5. Engine fault setting and exclusion training
6. Engine practical operation and theoretical exam training
